FUK LOY CHUEN KAM CHUEN KINDERGARTEN

Principal's Words

Dear Parents and Children:

The new issue of the school newsletter has arrived! In this spring-filled season, we will embrace Easter and also watch the children's growth and improvement on a daily basis. As principal, I am overjoyed and excited about each child's future! Easter is about to begin, a festival of "love and hope"! The Bible says that Jesus was willing to make a sacrifice for the sake of the world and was risen three days later, giving us hope for eternal life. This narrative serves as a reminder that love is the most powerful force, capable of overcoming any obstacle. Parents sharing this touching tale with their kids can help them to experience unqualified love and forgiveness. Moreover, appreciate their family and friends surrounding them and grow up with complete interests.

《Be Courageous and Confident. Love to Explore》

In five months K3 students, YOU will transition from Kindergarten to Primary school. I hope you can remain courageous and confident, fearless of challenges, and have the bravery to try something new. At the same time, enjoy exploration, be curious about the world, have a positive and active learning attitude, let knowledge be the wings of your growth, and fly to a greater future!

《Happy to Share. Say Thanks Together》

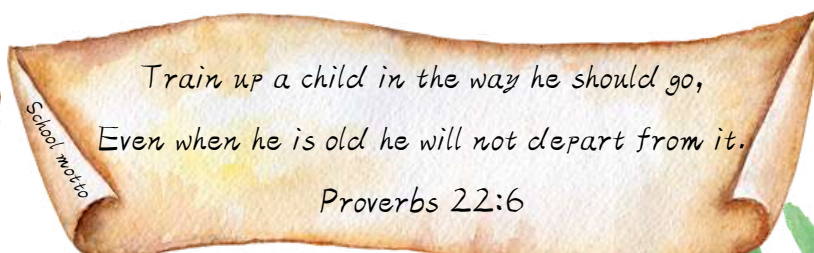

K2 Students, YOU are currently in an essential phase of improving your social skills. I hope you may learn to form positive relationships with others and understand how to share, cooperate, and communicate. At the same time, you should be courteous to others, take the initiative to care for and help others and be a kind little angel. In addition, learn to accomplish things on your own while developing independence, be grateful for everything and value the people and things around you.

《Show love. Pay attention to hygiene. Participate together.》

As our school's youngest class, YOU are the cutest tiny seeds on campus! I hope you can begin to learn to care for those around you and become a loving and nice youngster. At the same time, you should focus on personal hygiene, keeping your home clean and neat, and developing appropriate living habits. Actively participate in class activities, enjoy learning and grow healthily!

Finally, I'd want to thank all of the parents for their ongoing support and trust. Lets all collaborate to create a nurturing environment full of love and joy for our children! Happy Easter, everyone! Peace and pleasure!

Principal, Mak Wan Han

*Train up a child in the way he should go,
Even when he is old he will not depart from it.*
Proverbs 22:6

The "Food" topic allows children to learn the names and various types of food, as well as experience food using several senses. Children learn how to utilize utensils properly in order to establish healthy eating habits such as not being partial to food and cherishing it.

Making Lunar New Year handicrafts allows children to learn how to greet one another while also experiencing the Chinese festival ambiance and culture!

The topic "Personal Hygiene" allows children to learn the names and applications of various cleaning products. It is believed that by transforming the "Dirty Lion King" into a clean-loving character in the picture book, children can establish good hygiene practices at a young age, improving their self-care abilities and personal hygiene awareness.

The theme of "Toys" allows children to learn about the different types and ways of playing toys, as well as classify them based on their features. Children can learn to comprehend the sentiments of others and boost their motivation to share by watching the protagonist in the picture book enjoy toys with his brother.

JESUS + U

The theme of "Family" teaches children about the many duties of family members, how to get along with family members, and how to recognize that everyone has different feelings. Furthermore, learn to care for and understand family members, develop the practice of taking the initiative to help with chores, and thank the Lord for blessing us with a happy family.

The theme of "Food" allows children to learn about the origins of food and how difficult it is to earn food. We should thank God for providing us with food and also thank the people and animals who provide it to us, in order to nurture gratitude in our children.

EASTER

The theme of "Environmental Protection" allows children to consider the value of things from multiple perspectives, learn about different uses of garbage, learn to care for and recycle items, and create a resource-conserving mindset.

Inclusive Community

Children can learn about accessible and barrier-free facilities in their community through exploratory activities, hands-on learning and the requirements of individuals with disabilities. This helps children improve their caring, respecting, and helpful attitudes towards the establishment of the concept of an inclusive community.

Money

Children can learn about the value of Hong Kong money through play-based learning. This will help them create a correct concept of money and guide them to consider how to use money from many perspectives. Therefore, children will establish strong financial management concepts and habits.

welcome!

On-Campus Social Worker Activities

Hello, everyone! I'm Ms Chong Lai Chung, Eva, a resident social worker who joined Fuk Loy Chuen Kam Chuen Kindergarten in January. I am with The Salvation Army Social Service Department Pre-School Wok Services (Tsuen Wan West Team). I've previously worked in family service and crisis assistance, as well as assisting parents and secondary school children with a variety of issues. I am honored to provide on-site services to Kam Chuen's children and families during this time. This enables me to get to know each of these unique children and parents, hear their experiences, follow them through the ups and downs of life, and most importantly, tackle the obstacles and challenges of growth and discipline alongside them. My daily responsibilities include child and parent counseling, arranging various sorts of support groups, parent discipline seminars, parent volunteer training, and other activities linked to good family education. I want us to know each other further in the future!

In addition to being a social worker, I am a mother of a 6-year-old child. My daughter has just finished three years of kindergarten. As a mother, I like everyone else. I can vividly recall all of the events, difficulties, and obstacles that occurred. Each child is a gift from God with his or her own distinct personality and characteristics. Children are vibrant and active as well as mischievous. Therefore, we have to stay alert and work hard along side with them to build a healthy relationship. Some children may be gentle and simple to follow, but they may also have developmental difficulties that create anxiety for their parents. There's an ancient saying: "Raising a child for a hundred years means worrying about him for ninety-nine years." This may accurately describe the feelings of parents all around the world! We may have to face numerous hurdles and challenges along this process before we can finally make it through. However, every time a hard time has passed, I feel I have achieved another stage in my challenge and I have more things to learn. As a result, I am really excited to accompany you here at Kam Chuen on this tough and rewarding journey together!
